

EggXact

Reliable and durable egg counters

Do you want real-time insight into the egg production of your layers or breeders? The EggXact egg counters automatically register the number of eggs in your poultry house. That way you are aware of the performance and health of your animals 24/7.

EggXact egg counters: reliable and durable

We are proud to introduce to you Hotraco's latest innovation in egg counting. The EggXact egg counter is the ultimate result of over 20 years of experience and innovation in the world of egg counting. With over 75,000 egg counters in the field, we know what is most important about egg counters: 1) they must be accurate, and 2) they must work all the time. We've gone to great lengths to make the most reliable egg counting system on the market.

Detect production differences and respond quickly to failures and diseases

When your chickens produce less eggs you know there is something wrong. Do you want to detect and locate problems in your barn within seconds and take immediate action when needed? With an egg counter on each belt, you can detect production differences immediately when production results go down. The egg counters work with every system and on any device, including your phone.

Why egg counting?

- Detect production differences
- Respond quickly to failures and diseases
- Always up-to-date laying percentages
- Developed for perfect Egg Flow Control to reduce costs

Always up-to-date laying percentages

Real-time insight into the number of eggs per belt per day, hour and minute. That way you are aware of the performance of your animals 24/7 and you always have an up-to-date laying percentage. The egg production can also serve as a good indication of the health of your animals.

Egg counters for different types of housing

EggXact egg counter are suitable for different types of egg belts, for all types of eggs, and all types of barns. From cage to cage-free housing systems. The fully automatic counting of system eggs is unique and highly innovative in this sector.

Developed for perfect Egg Flow Control to reduce labor costs

Hotraco's Egg Flow Control system automatically adjusts the speed of each egg belt, so that the amount of eggs on the collection belt always perfectly matches the packing capacity. This helps you significantly lower your labor costs and reduce egg breakage.

Real-time data sharing

This egg counting system is developed with a high-speed communication system for these EggXact egg counters, with real-time data exchange. Thanks to a clear visualization of the count on the display, egg producers can detect and locate problems within seconds and take immediate action when needed.
