

Croptimiz-r MAX

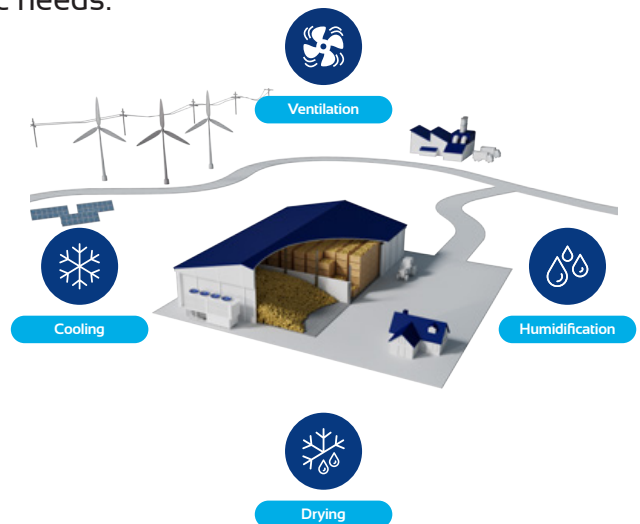

Premium controller.
Perfect storage conditions.

Mooij Agro's Croptimiz-r MAX is a multifunctional controller designed to give you complete control over all storage processes, up to 16 cells in the same time, ensuring the highest quality and minimizing product losses. Our expert team can help you create an effective crop storage system, optimized for your specific needs.

All-in-one storage solution

The Croptimiz-r MAX is the all-in-one solution suitable for any type of crop storage. It regulates, controls, and monitors key processes like ventilation, heating, cooling, and circulation. With a 12-inch full touchscreen interface, the system is intuitive and user-friendly.

- Real-time control of ventilation, heating, cooling, and more
- Perfect balance between energy savings, crop quality, and yield
- Trusted software powered by next-gen hardware
- Next-generation touchscreen, controllable by app

Smart assistant wizard: EVA

The Croptimiz-r MAX is a versatile, well-organized storage system equipped with a smart assistant, enabling growers and operators to respond effectively to changing conditions throughout the storage season.

The Easy Virtual Assistant (EVA) is an intelligent assistant integrated into the Croptimiz-r system, featuring an interactive guide and simplified setup options. EVA provides support at critical times, such as during the storage phase, by helping set optimal initial settings and providing timely information throughout the entire season. EVA ensures operators have the right information at the right time, making it easier to maintain ideal conditions and achieve optimal results.

High ease of use

Croptimiz-r MAX stands out for its simplicity and ease of use compared to competing systems. It provides detailed information and immediate feedback to guide users toward the most suitable settings for current conditions. This empowers operators to make informed,

independent decisions—leading to better storage choices, reduced food loss, and increased energy efficiency.

Focus on harvesting, less worry about storage

We understand that growers and operators are under pressure during the harvest season. EVA provides 24/7 assistance, offering helpful suggestions and enabling growers to make informed storage decisions quickly and effectively. By ensuring optimal storage settings, the Croptimiz-r MAX allows growers to stay focused on harvesting while achieving the best possible outcomes for stored crops.
